

Federal Bank

Welcome to the Federal Bank Brand Guidelines

At Federal Bank, a brand isn't just a logo, a colour palette, or a design system. It's the feeling people carry when they walk away from an interaction with us. It's the trust we build, the simplicity we bring, and the relationship we nurture.

This guideline is your go-to companion for understanding our renewed identity and using it with clarity and consistency. It reflects the way we choose to show up, simple in our approach, honest in our intent, and approachable in every touchpoint.

Our brand has always been rooted in listening with care, helping even before a request is made, and building trust one interaction at a time. These guidelines bring together the core elements of the Federal identity system, from our brand identity and assets to our language and usage principles so that every communication feels unmistakably "us."

Brand Tone of Voice

Brand TOV

A brand's tone of voice is the way it speaks, and how people experience the brand in every interaction, from ads and emails to conversations at a branch.

A consistent tone of voice helps customers instantly recognise the brand's personality, understand its intentions, and feel the relationship it wants to build with them. In simple terms, tone of voice is how a brand sounds when it talks and how it makes people feel when they listen.

Federal Bank has always believed in ***relationships, trust, and genuine human connections***. So we have ensured that our new Tone of Voice should naturally reflect this philosophy and is in alignment with what Federal Bank already practices.

— TOV Principles

This is how your brand will sound to people whenever they encounter your brand communications. Among the four principal TOVs, choose the right one based on the kind of information you are communicating.

— TOV Calibrations

Key Principles

Warm

Every word should feel personal and kind, as if coming from someone who truly cares. Someone who is genuinely happy to see you.

Empathetic

We understand where people are coming from and their real-life needs before giving advice.

Grounded

We are real, simple, and confident without being flashy. We keep things real and relatable. There's no jargon or grandstanding.

Determined

Since we are driven by what's good for the customer, sometimes, it has to be communicated with confidence and a sense of purpose for it to make an impact.

Brand Wordmark & Insignia

Brand Wordmark

To emulate our brand philosophy of 'Rishta' our wordmark is in sentence case making it feel more approachable and inclusive.

The rounded typeface balances sharpness with warmth, symbolising precision without authority. The italicised style represents bank's forward looking vision, the yellow underline stands for partnership and support, reinforcing the bank's role as a trusted platform for customers.

Federal Bank

Brand Wordmark
Proportions

To maintain visual harmony and balance, the brand workmark and the line beneath it are designed to ensure proportionate spacing. The line below the wordmark should maintain a gap that is approx. 2/3 rd of 'X'. Do not alter the wordmark lettering or the spacing of the line beneath it.

X = Height of the horizontal stroke of the letter 'F'

Brand Wordmark Colour Usage

The following examples show the correct use of the wordmark with our primary colours.

* The line below the wordmark will not be in greyscale. It will always be in white or black.

Brand Wordmark
Clear Space &
Mimimum size

Clear space around the wordmark must be equal to the height of the letter “e” in the Federal wordmark.

The minimum size of the wordmark should ensure that all elements remain clear and legible. The wordmark must not be reproduced at a height smaller than 8 mm in print or 20 px in digital formats.

Mimimum size

PRINT 8 MM 

DIGITAL 20 PX 

Wordmark Usage

The *primary usage* of the wordmark should remain consistent across all layouts, with placement on the top right or bottom left. Always respect the minimum size and clear space requirements.

In its *hero usage*, there is more room to experiment with composition, but the wordmark’s colour, proportions, and overall integrity must never be altered.

Brand Insignia - The Fortuna Wave

We call our brand insignia
The Fortuna Wave, the sign of good
fortune, a symbol consisting of three
waves that signify a synergy of
Authenticity, Togetherness & Prosperity.

The Fortuna Wave Proportions

A strong brand insignia begins with a meaningful core story that gives the mark depth beyond aesthetics. Its geometry and proportions are crafted with intention, ensuring clarity, balance, and purpose. When built well, the insignia scales effortlessly, from the smallest icon to the largest façade, carrying narrative and identity wherever it appears.

The Fortuna Wave
Colour Usage

The following examples demonstrate the correct use of the Fortuna Wave with our primary colours.

The Fortuna Wave Colour Usage

The Fortuna Wave may also be used on an image background, provided the same principles and guidelines are followed.

Colour usage

1. Yellow insignia
 - On darker images
2. Blue insignia
 - On midtone images
 - Lighter tone images

Greyscale usage

1. White insignia
 - On black background
 - On grey background
2. Black insignia
 - On white background

The Fortuna Wave Usage

To avoid the repititive use of wordmark in a series of communication we can use the Fortuna Wave as a *sign-off*. It will always come after the workmark has already been established.

For example:

1. On Letterheads the 'F' Wave can be used on the continuation sheet
2. Similarly it can be used in social-media carousels.

LETTERHEAD

SOCIAL-MEDIA CAROUSEL

The Fortuna Wave Usage

Expressive Illustrative usage.

We have activated our brand insignia to be used extensively to celebrate stories within and around it.

For example:

1. It can be used to tell stories through line art, 2d and 3d graphics or real photography contained within.
2. Can be minimally tweaked to reflect the context of the occasion being celebrated.
3. Can be used as a graphic element placed behind images. Just ensure it's not completely eclipsed and should be distinguishable.

3.

The Fortuna Wave
Incorrect Usage

Do not attempt to recreate or alter the *The Fortuna Wave* insignia. Always use the original, approved brand assets provided.

- 1. Do not change or mix and match the colours.
- 2. Do not apply an outline.
- 3. Do not alter the thickness of the lines.
- 4. Do not stretch, squeeze, distort, or tilt.
- 5. Do not add drop shadows.
- 6. Do not place it inside any shape.
- 7. Do not place any textures or patterns behind it or inside.
- 8. Do not mask images inside, that tells an incomplete story.
- 9. Do not place it on busy or cluttered images.

Wordmark & Fortuna Wave Lockup

The lockup of Fortuna Wave and the wordmark is not to be used in general communication. They will appear together only in specific cases like a sponsorship panel or building facade, where there is limited space.

HORIZONTAL LOCKUP

STACKED LOCKUP

Wordmark & Fortuna Wave Proportions

The height of the Fortuna Wave is twice the height of the letter 'F' in the wordmark.

Note:
Do not reproduce the lockup by yourself. Use the one provided in the guidelines.

Colour Palette

Colour Palette

A defined colour palette ensures consistency and recognisability across all brand communications. By creating a unified and memorable visual language, it expresses the brand's personality and builds trust, clarity, and cohesion at every touchpoint.

Our refreshed identity builds on familiar colours. The ***Federal Blue*** is now more vibrant, supported by a deeper ***Midnight Blue*** for practicality in retail environments. ***Golden Glow***, ***Soft Sand***, and ***Pure White*** add warmth and clarity to the core palette.

A set of carefully selected secondary and tertiary colours complement the primary palette, enhancing flexibility while maintaining a cohesive brand presence.

Primary Colour Palette

Our primary colours form the foundation of the brand, creating immediate recognition and a consistent visual identity.

It’s used for key brand collateral, logos, core messaging, and signature visuals to ensure strong recognition and consistency.

Federal Blue For contemporariness and youthful appeal. PANTONE 2728 C HEX #004CBE RGB 0, 76, 190 CMYK 97, 75, 0, 0	Golden Glow Represents optimism and energy. Brand Patterns

Graphic Patterns Using the Fortuna Wave

We have developed graphic patterns derived from our brand insignia, *the Fortuna Wave*. These patterns are an integral part of our visual identity and should be used consistently across brand collateral and merchandise.

Please use only the approved patterns and apply them exclusively with the primary and secondary colour palettes. Avoid creating additional or unapproved pattern variations, as this may lead to confusion and reduce brand consistency.

These patterns are designed to enrich our visual language while maintaining a cohesive and recognisable brand presence.

Typography

Typography

This section outlines the essential typography guidelines and offers direction on how to apply them effectively.

Typeface chosen for Federal is ***Warm, Humanist Modern serif*** that adds a distinctive and approachable character to the brand.

Chosen from Google Fonts, it offers free licensing and easy web implementation with various weights available for each style.

Our Typography

While most banks rely on sans-serif fonts, the typefaces chosen for our brand's visual system help us stand out with a contemporary yet refined look. ***Merriweather***, a modern serif, adds distinctive character to the brand, and is only to be used for headlines.

While ***Lato***, a clean and rounded sans-serif, complements the warmth of the primary font. Its simplicity ensures clarity and harmony across both digital and print applications. Together, they create a modern and balanced hierarchy that reflects the brand's approachable and trustworthy identity. Lato should be used for subhead & bodycopy.

Microsoft / Email Usage

Where custom fonts may not be available and sharable, we use system defaults: ***Georgia*** as the substitute for Merriweather and ***Verdana*** as the substitute for Lato.

Typography Hierarchy

Headlines should be set in *Merriweather*, with *Lato* used for subheadings and body copy, including long-form text. Ensure readability and hierarchy by keeping a clear size distinction between headlines and body text. Feel free to experiment with different weights and styles, but always avoid using the same size for both headlines and body copy. Headlines should always be the most prominent element, with body text supporting and elaborating the message.

Photography

Photography Style

A distinct photography style ensures consistency and recognition across all brand communications. Capturing candid, real-life moments with authentic emotion and natural environments create a human, optimistic visual language that deepens connection and trust.

Our photography style is ***candid*** and ***documentary***, capturing real people, real-life situations and honest everyday details in their natural environments.

Photography is divided into 3 sections, ***people portrait***, slice of life ***moments*** and ***objects***.

Our Photography Style

People Portraits

Keywords:

Unstaged | Optimistic | Natural

Our photography style follows an *unstaged, documentary* approach, capturing authentic, everyday moments with genuine emotion. It *emphasizes optimism and realism*, using *natural light and real colours* to maintain honesty and warmth. Subjects are shown in their *true environments*, creating relatable and human-centered imagery. The overall tone feels *authentic, optimistic, and emotionally engaging*, reflecting transparency and trust.

Our Photography Style

Moments

Keywords:

Full of life | Storytelling | Active Moments

When it comes to capturing moments, our imagery is **full of life**. Like a picture can say a thousand words, each image should **tell a story**, which goes beyond the picture itself. Capturing the real emotion in moments that are **active and are never staged** or posed. The scenes are shot in **real environments**, natural play of light adds more personality that is true to Federal Bank.

Our Photography Style

Objects

Keywords:

Real Environment | Light & Shadow play | Authentic

When we want to use objects to convey a narrative, benefit or cue lifestyle, we capture them in *real surroundings* with beautiful *play of light and shadow*. Making the visual more relatable and *authentic*. While the picture are well art directed and framed they aren't shot to look like a studio shot or on flat vibrant backgrounds colours. They should hint a touch of wellness and optimism.

Photography Incorrect Usage

Do not attempt to stage the objects, people or moments in unannatural environment. Always follow the style instructions in every brand communication.

1. Do not have the subject look into the camera.
2. Do not show highly manipulated or over-photoshopped images.
3. Do not use staged candid moments and limbo background.
4. Do not show inauthentic or posed feelings images or dramatic lighting.
5. Do not use studio lighting for objects.
6. Do not stage the objects or use flat vibrant background.

Illustration

Illustration

Illustration can communicate ideas quickly, but it also brings emotion and character. Illustration works best when it does what photography can't, simplifying complex topics, explaining concepts, or giving a clear overview of something like an event.

To give Federal Bank an aesthetic edge over fintech and corporate brands we have added *hand drawn, realistic* and *mature minimal* illustration style to our toolkit.

Iconography

Iconography

Iconography is used to visually express abstract or intangible concepts, in a clear and immediate way. Icons create a cohesive visual language that supports typography, improves understanding, and enhances the overall clarity and usability of our communications.

For a distinct and ownable iconography, the fundamental style of our icons are ***derived from the Fortuna Wave*** of Federal Bank.

Our Iconography

Our iconography follows a consistent visual language derived from the **Fortuna Wave** insignia. Each icon is made of a **10pt uniform stroke** with **sharp edges** and **angular contours**, and **one-side rounded corner** borrowed from the insignia.

Every icon has to be built on a 10pt x 10pt grid with a 10pt stroke for consistency.

Brand Collateral

Our brand collateral bring the identity to life across multiple touchpoints. The wordmark and Fortuna Wave pattern reinforce a *cohesive, premium, and trustworthy presence*. This flexible approach ensures the brand feels *consistent, recognizable, and distinct* in every interaction, reflecting both *professionalism and approachability*.

Layouts & Grid system

Layout System

A layout system is an essential part of communication in designing a recognisable, consistent and signature look that is adaptable across all formats of brand communication.

To create a signature Federal Bank look, we created a recognisable framework that is derived from the form of the ***Fortuna Wave*** insignia.

Our Layout System

Our layout has an ownable style that borrows from our ‘*Fortuna Wave*’. The system is adaptable across various formats and needstate. Be it image forward creative for hoardings or a simple type based social post, the system is modular while retaining its unique federal signature style.

Vertical Layout Grid

In commonly used A3/A4 vertical layouts, use a **6-column grid**. The margin must be equal on all sides. The gutter width should be consistent across the composition.

Margin = X, height of the logo.
Gutter space = X/2,
height of the logo.

X is the height of the logo.

Horizontal Layout Grid

In common horizontal layouts, use a **9-column grid**. The margin must be equal on all sides.
The gutter width should be consistent across the composition.

Margin = X, height of the logo.
Gutter space = X/2,
